21C3 - the usual suspects

Fahrplan Day 3, 10:00-18:00

41.0.2

33: How To Herd Cats (Druid) · Despite to hacker ethic of free information real life ameworks for constructive dialogue are sad-lacking, Interestingly a number of systems, om socratic dialogue to parliamentary procere already exist for structuring conversation ward a goal. In this talk we will look a their workgroups from open source developers CTF teams 35: Voting Machine Technology (Tom tamphour) · The talk will be about voting achine technology, a short history, its vulnebilities and overall reliability. There will be a oncentration about the Diebold e-voting code dit its limitations.	250: Lightning Talks: Day 3 (Hanno Wagner) Lightning Talks are your chance to give in- troductory talks for your projects, interesting technologies and evolving developments and other things that might be interesting to the 21C3 audience. 15: Sicherheit bei VoIP-Systemen, eine Einführung – Welche Standards gibt es, was wird de-facto wo genutz? (Christian Louis) Der Vortrag beschäftigt sich mit Sicherheit von	46: Toll Collect – Verpeilen im industriellen Maßstab //olker Birk) - Technik und juristischer Hintergrund des Mautsystems ausgeleuchtet nach Stärken, Schwächen und dem Überwachungsauftrag. 111: The Kernel Accelerator Device – Reconfigurable computing for the kernel /Lud-	127: Security Frameworks – An enterprise approach to security (Robert Frazier) - The presentation looks at security from a framework approach, using the OSI 7 layer model to map security tools across the enterprise. The discussion centers on how security tools map to the OSI model to provide end-to-end security.	256: On finding the score to visuals (codeep: Ros Roca, codeep: Seex) · To find a standard wich can be used as a medium that can perser- ve the work of a vj for instituonal conservation and later use, we must first define the form of art that it is. Visuals are determined by several crucial factors that we try to shine light on.	305: (K)ein Anschluss unter dieser Nummer – Die Informationsgesellschaft: Neue Chancen und Hemminisse für geschlechtergerechte Entwicklung (Heibe Annsen) - Dr. Heike Jensen (HU Berlin und terre des femmes) ist mit Olga Drossou in der einzigen Frauengrup-	286: AVIT Breakfeast Day Three (Toby- spark) - Breakfeastmeeting as daily introduc- tion. There will be free Brötchen, Kaffee and Tee for the attending VJs.	231: Lockpicking von Meisterhand – Für Anfänger und Fortgeschrittene – Zu jeder vol- len Stunde beginnt ein Lockpicking-Workshop. Traditionell werden die ersten Workshops von
le hacker ethic of free information real life ameworks for constructive dialogue are sad-lacking. 	VolP, einem Stiefkind der Entwicklung rund um diese neue Killerapplikation. Es wird versucht, einen Überblick über bestehende Produkte und Lösungen zu geben und aufzuzeigen, welche Sicherheit heute	wig Jaffé) · KAD is an interdisciplinary de- velopment project which consists of ker- nel driver programming, Typa programming (VHDL/Verilog) and hardware development. There is no working KAD at the moment, but our aim is to develop such a device under the GPL with much support from everyone who	126: Apache Security – Improving the secu- rity of your web server by breaking into it /Se- bastian Wolfgarten) - While apparently being quite secure out of the box the Apache web server is still a well-liked target for hackers. This talk will help system administrators to improve the security of their site and will also cover techniques on attacking a web server.	253: Pixels want to be many – High definition video and reasons for using it n a VJ context (*Vlout/Pixe/Fa, *Vlout/Pixe/Fa, *			
38: Protesting in the new Millenium— he Use of Electronic Communications to Pro- str (Emmanuel Gold-Goldstein) - Emmanuel Gold- ein describes the changing times in the Uni- d States. While hackers were always looked now With suspicion, they are now seen as a ry definite threat on the order of terrorists. did activism into the mix and there's no end the potential for	122: Enforcement of Intellectual Property Rights under German Private Law — An out-line in view of the European Directive on the Enforcement of Intellectual Property Rights (2004/48/EC) (Ulrike Mahlmann) - The objective of the European Directive "on the Enforcement of Intellectual Property Rights" is to help prevent intellectual property infringements and to	163: SPAM Workshop – SPAM- und Zombie- Abwehr bei hohem Mail-Volumen am Beispiel von gmail (Sirko Zidlewirz). SPAM-Mails und virenverseuchte Mails von Zombie-Rechnern stellen für kleine und große Provider eine dau- erhafte Herausforderung dar. Am Beispiel von gmail wird die Integration von einem mehrstungen, modularen Anti-SPAM-Konzept erfäu- tigem, modularen Anti-SPAM-Konzept erfäu- tert. An welcher Stelle des "Qmail-Big-Picture"	11: xDash — Wie integriere ich meine Applikationen mittels Instant Messaging? (Derzy Machowiak). In praktisch jeder Firma existieren Applikationen nebeneinander, die auf unterschiedlichen Betriebssystemen und Datenbanken laufen. Das Rückgrat der Integration von IT-Systemen nach dem Muster "Publish!Subscribe" bildet der "Asynchronous Messaging	254: AVIT*C3 MIDI Lab — MIDIFY - DONT MYSTIFY (Elektroschroeder, Hamageddon) - in this workshop we will explore different me thods of controlling vj applications with dedi- cated midi hardware.	140: A Fat Girl's Intimate Perspective on Hacker Culture and Spaces – How to Survive a Cock Fight, without a Cock (#9punk) Despite her gender handicap, "b9punk" has managed to chill out in the American Hacker scenes and retain her self-respect. Her contemporaries think that's a pretty big accomplishment and would like her to talk to you about her (pending) patented formula for what she cru-		
38: MD5 To Be Considered Harmful So- eday (Dan Kaminsky) - Joux and Wang's utiticollision attack has yielded collisions for everal one-way hash algorithms. Of these, D5 is the most problematic due to its hea- deployment, but there exists a perception at the flaws identified have no applied im- ications. We show that the appendability of erkle-Damgard allows us to	278: TKÜV - Das Ohr am Draht - Recht, Regulierung und Realität der Telekommunikati- nosüberwachung in Deutschland (Jörg Müller- Kind) - Rund 200 Verpflichtete müssen bis zum 31.12.2004 Konzepte für die Überwachung von E-Mail bei der RegTP eingereicht haben. Über Breitband-IP-Access (XDSL, Cable, Wire- less) und VoiP wird heftig	alles nur Flickwerk? Bewußt werden even- tuelle zukünftiger Standards noch nicht be- rücksichtigt, sondern nur derzeitig umsetzt be- rücksichtigt, sondern nur derzeitig umsetzhez Möglichkeiten zur Kombination verschiedener Verfahren erklärt.	17: Next-Generation Peer-to-Peer Systems (Magnus Kolweyh) - A significant paradigm for the Internet are Peer-to-Peer Systems. Those networks form new types of distributed information platforms. The lecture will discuss concepts for Next-Generation Peer-to-Peer Systems that range beyond the scope of todays filesharing applications.	73: Coden auf dem Info-Layer – Die Hierarchie der Online-Kommunikation oder: Warum der Titel die Botschaft ist (Frich Möchel) - Im Zentrum von Vortrag/Workshop stehen Auswahl, Analyse und Produktion von Nachrichten für News/sites, Weblogs, Mailing/lists etc. Definition der eigenen Ziele und der möglichen Dialog-Gruppen. Zusammenstellen der Quellen und Brauen der eigenen Nachrichten/mixtur.	getting something out of the hacker scene be- sides sex." She's also conducted a extensive survey with	259: Apple Motion on the Workbench Introduction and Working with Apple Motion (FALK). Meant as a short introduction into Apple Motion as a very fast tool for preparing VJ loops. This will be a collaborative exploration of the program for everyone to have a look at this marvelous tool.	
34: Secure Instant Messaging – Suppressi- nof secure communications by governments hay! — The talk describes some of the cur- nt practices of Instant Messaging providers, dl go over what makes some of the design olices better or worse, describing possible alk known attacks against messaging proto- los and suggest possible solutions to those oblems. If possible a live	168: Spam-Politik – Politisch-rechtliche Bekämpfung unerwünschter Information (Dirk Schmidt) – Spam ist ein nicht einfach zu fassender Begriff. Unterschiedliche Perspektiven auf die spam-Phänomene, entgegenstehende Interessen und die Historie führen zu unterschiedlichen Problemdarstellung und schließlich Lösungsvorschägen für die spam-Bekämpfung. Dieser widmet sich der	218: Practical Mac OS X Insecurity – Security Concepts, Problems, and Exploits on Your Mac (Angelo Laub) - Some recent security problems with Mac OS X stem from the fact that Apple tries to combine the Unix security model with easy and convient usability and closed source. Showing examples from our own research we will take you on a pleasant journey to get root on almost any	40: Firewall Piercing – Creative exploitation of valid Internet protocols to get your data through obstacles (Alienā, Maik Hentsche) - IT will be shown how IPv4 based protocols can be used to tunnel data through Firewalls while maintaining RFC compatibility. The goal is to show a broad spectrum of techniques. However, a few examples are presented in more detail.	wie man aus lexten unbekannter Autorinnien ideologien, Meinungen und Werte herausfiltert. Die gnadenlose Hierarchie der Online-Kommunikation oder: Weshabl der Titel die Botschaft ist. Sowie weitere bisher bekannt gewordene Faustregeln der E-Kommunikation anhand von praktischen Beispielen. Produktion eines Nachrichtentexts, der am Ende des Workshops auch publiziert wird.	273: Crashkurs Mathematik am Beispiel Biometrie (Jule P. Riede) - Dieser Vortrag ist ein Crashkurs in Mathematik am Beispiel Biomettie. Ausgehend von dem Problem, eine Iris in einem Foto zu lokalisieren, fangen wir bei der Definition einer Funktion an und landen via Trigonometrie, Differential- und Integralrechnung, sowie ein wenig lienerer Algebra bei Vektoranalysis und Statistik.	328: Pure Data and Gem for VJs – hacking with pure data: the VJ edition /Asi Serbest, Peter Plessas). An introduction to the open source alternative to the widely used PD graphical programming environment with special emphasis on GEM the Pure Data Open GL enginge	
58: How to find "anything" on the Web— dvanced internet searching strategies & "wi- rd seeking" its (Fravia) - Participants will be trained to become good "seekers". Techni- ies and tricks used for efficiently searching rough the world wide web will be taught and arch engines will be reviewed in short: the coker's approach to	net aktiv weil dies eine Kommunikationsmög- lichkeit darstellt die sie im 'real live' nicht oder	107: Embedded devices as an attack vector (Stephen Lewis) - Although attacking embedded devices is not a new idea, little work has been done on using these devices for attack. Here I present work on the insertion of custom code into a network switch in order to carry out attacks on a network.	72: The Reality of Network Address Translators — Dealing with NAT (Harald Wolte) — NAT's are ubiquitous in todays Internet. Unfortunately the IETF missed to recognize this reality. Due to this lack of standardizaiton, NAT's pose an enormous threat to the paradigm shift from client-server to peer-to-peer. The presentation covers proposed solutions.			262: Pixels don't need no money – Ethics of a corporate sponsored VJ scene (#ALK) With the recent push of large corporations (like Motorola and BMW) or mass media (like MTV) into the VJ scene questions are raised of how we can sustain a community driven scene without capitalistic influence and its main focus on the artistic side of our craft.
